

Challenges

Despite the growing prevalence of NASH, there are currently no approved treatments for the disease beyond liver transplant. Current challenges are:

- **Growing prevalence** of NASH, however still underdiagnosed
- **No current FDA-approved treatment** for NASH exists but liver transplantation
- A **multitude of targets** to go through clinical trials rather quickly
- Invasive **liver biopsy** diagnosis as **gold standard** reduced patient interest in clinical trials

Success

Our success in supporting clinical trials in liver diseases is based upon:

- **Biomarker testing**
- **Custom assay development**
- **Global biopsy/slide handling and processing** for KOL investigators
- **Tech transfer** related to **NASH** and **liver diseases**
- **Monitoring metabolic response** to drug and placebo
- **Tracking improvement of condition** after drug administration
- **Studying subgroup differences** and assuring **randomization verifying comparability** in study arms
- Developing a **tailored companion diagnostic**

Where to find us?

Cerba Research HQ EU,
Industriepark 3, Zwijnaarde
9052 Ghent, Belgium

Cerba Research TW,
11F, 3 Park St, Nangang Dis
11503, Taipei, Taiwan

Cerba Research AU,
50 Montgomery Str,
Kogarah
NSW 2217, Australia

Cerba Research CN,
128 Xiangyin Road,
Shanghai, China

Cerba Research US,
5 Delaware Dr, New Hyde
Park NY 11042, USA

Cerba Research FR,
126 Rue Emile Baudot
34000 Montpellier, France

South Africa (BARC SA),
11 Napier Road, Richmond
Johannesburg, South Africa

Cerba Research FR,
7-11 Rue de l'Équerre
95310 Paris, France

Central Lab Division NASH Research

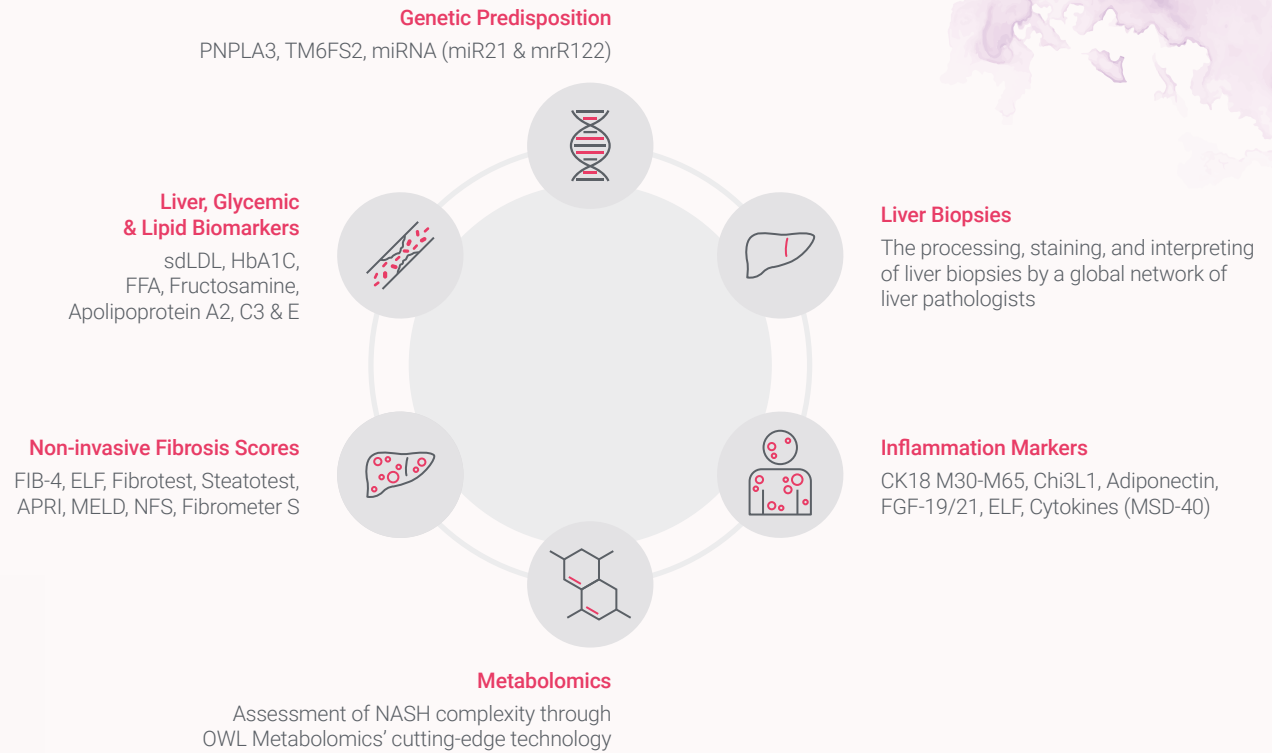

Why should you choose us for your clinical trials?

There is no substitute for experience, and Cerba Research leverages current expertise in delivering multiple global NASH programs, including the largest NASH program in the industry.

Given our expertise in NASH and operational flexibility, we believe we are the ideal lab partner for you making it our mission to support you in your combat against this chronic liver disease. Moreover, we combine our unique experience as a major international central laboratory with the cutting-edge technology of our partner, **OWL Metabolomics**. Together, we provide a broad range of clinical support solutions for NASH research.

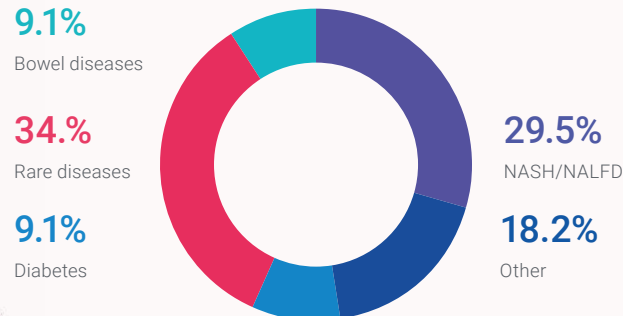

Services & Capabilities

At Cerba Research, we offer a broad range of clinical support solutions.
