

The added value of Clinical Trial Operations and Logistic Excellence

Clinical Trial Operations and Logistic Excellence is a center of excellence focused on logistical services for phase 2 and phase 3 trials and customized gene therapy projects. We provide logistics support to pharmaceutical and bio-technical industries. With our unique set-up, you can monitor sample quality from sampling to the final study test results. With our global network of processing laboratories, we guarantee 100% on-time delivery. Your trial deadlines are met because of fully trained staff-members, temperature monitoring and ISO15189 accreditation.

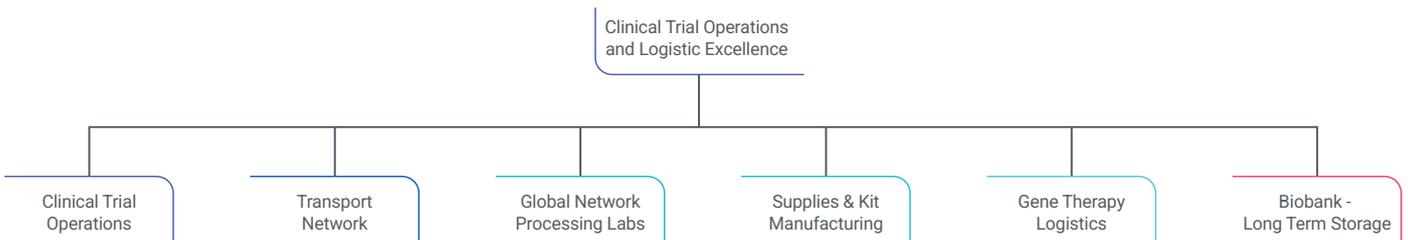

Viroclinics-DDL, a Cerba Research Company

Viroclinics-DDL operates at a global level, being the preferred virology testing laboratory for several of the top-10 Biopharmaceutical companies.

Clinical Trial Operations and Logistic Excellence

Clinical Trial Operations and Logistic Excellence is a separate business unit within Viroclinics-DDL that helps biotech and pharmaceutical companies with global logistics during phase 2 / phase 3 in clinical trials. With 41 partnering (processing) labs all over the world, we can guarantee 100% on time delivery and successful data management. For any kind of sampling, kits are custom-built, distributed, and retrieved with a track and trace code to be analyzed in our facilities. After a study, samples can be stored short-term or long-term in our bio bank facilities. A 24/7 helpdesk is available for all studies to ensure fast turn around times and peace of mind.
